

EcosNode (ECN) — Whitepaper

Utility-first token on TRON (TRC20) • Fixed supply tokenomics • Ecosystem roadmap

Version 1.0 • Date 01 Jan 2026 • Decimals 18 • Total Supply 1,000,000,000 ECN

Important Notice. This document is provided for information only. ECN is a utility token and does not represent equity, ownership, or guaranteed returns. Nothing in this whitepaper is financial, legal, or investment advice. Cryptoassets involve risk and may lose value.

1. Executive Summary

EcosNode is building a utility-focused ecosystem where ECN supports community participation, platform utilities, and planned staking features (Phase 2). The token is deployed on TRON (TRC20) with a fixed supply minted at deployment and distributed across defined allocation wallets and smart contracts.

2. Problem & Opportunity

Many Web3 projects struggle with unclear token distribution, misleading marketing, or short-term incentives that harm long-term sustainability. EcosNode aims to prioritize transparent tokenomics, clear disclosures, and practical token utility as ecosystem components are delivered.

3. Solution Overview

- **Utility-first design:** ECN is intended to be used for platform features and community programs.
- **Transparent tokenomics:** fixed supply and public allocation breakdown.
- **Smart-contract locked team allocation:** team tokens are held in a vesting contract with linear release.
- **Dedicated airdrop contract:** airdrop distribution uses a separate contract to increase transparency.

4. Token Details

Name	EcosNode
Symbol	ECN
Network	TRON (TRC20)
Decimals	18
Total Supply	1,000,000,000 ECN (fixed)

5. Contracts & On-chain References

Token Contract	TGRGXq2tcN P4Zh5w7jqc eZr62YtoaG BkEb	Core ECN token contract (TRC20 / TVM).
Team Vesting Contract	TJ7amPL1vu 29rxCTWyBy bz7mYjPHY9 bWri	Holds team allocation and releases tokens linearly over 24 months.
Airdrop Contract	TL6FRgq3UT NZiMx8KovY HWxJ4UPwAK KyjG	Receives airdrop allocation and distributes tokens to verified users in batches.

Always verify contract addresses using official links on <https://ecosnode.com>. Avoid interacting with unofficial tokens.

6. Tokenomics

The total supply is fixed at deployment. Allocation breakdown:

Category	Allocation	Notes
Airdrop	5%	Distributed to eligible participants via the airdrop contract.
Staking Rewards	20%	Reserved for future staking pools and reward programs (Phase 2).
Ecosystem & Partnerships	20%	For ecosystem growth, integrations, and partnerships.
Liquidity	15%	Liquidity provisioning and market support.
Team (Locked)	15%	Locked in vesting contract, released over 24 months.
Treasury	15%	Operations, development, audits, and sustainability.
Reserve / Growth Buffer	10%	Long-term reserve for strategic needs and contingencies.

7. Airdrop Program (Community Onboarding)

Participation is free. We never ask for seed phrases or private keys.

One entry per person. Manual verification is used to reduce duplicate/fraud submissions.

Eligible users are processed in batches according to the published timeline.

Incomplete, suspicious, or duplicated entries may be rejected.

8. Roadmap (High-level)

Phase 1 — Foundation: Website & documentation; token deployment and publication of contracts; community airdrop onboarding + verification.

Phase 2 — Growth: Staking pools and distribution rules; platform services powered by ECN; community incentive programs.

Phase 3 — Expansion: Ecosystem integrations and scaling; governance tools (if introduced) and transparent reporting.

9. Risk Factors

Market risk: token price may be volatile.

Technology risk: smart contracts and infrastructure may contain bugs despite best efforts.

Regulatory risk: laws and regulations may change in various jurisdictions.

Execution risk: roadmap items may change as development progresses.

10. Legal & Compliance Disclosures

ECN is intended for utility within the EcosNode ecosystem. This document does not constitute an offer to sell, or a solicitation to buy, any security or financial product. Users should consult professional advisors and comply with local laws and regulations.
